Hit the Brakes: Stop Drifting, Stay Stacked

3-Week Fix-It Plan

The problem

All your power is built in your load. When your hips drift toward the ball as you swing, you lose that power. Your hips drag, your barrel drags through the zone, and you hit the ball softer than you should.

The fix

Think about stopping hard on the brakes. The harder you hit the brakes in a car, the harder it stops. The harder your body stops, the harder your barrel comes through. Turn behind your front foot and stay stacked at contact: head over back shoulder, back shoulder over back knee.

What fixed looks like

- You're stacked at contact: head over back shoulder, back shoulder over back knee.
- You're driving the ball with authority, especially the other way.

Drills

Flow Progression, Lead Arm Only

Lead arm direction only. Flow into it, then turn hard behind your front foot.

Watch the video on your plan page: https://lcbtraining.com/fix-it/fixit-hit-the-brakes

Flow Progression, Two Hands

Bat dangling down, flow into your stance in one motion. Load, then go. Turn behind the front foot.

Stationary Feet-Together Drill

Feet together. Load with your chest over your feet and over the plate. Only bring your front foot forward as you stride, leaving all your power on your back leg. Then swing and stay stacked.

Low and Away Tee

Drive the ball the other way with authority.

Baseline test

Day 1, and again on the last day: Film 5 tee swings from the side. Pause each at contact. Are you stacked? Count how many of 10 tee swings are hard line drives.

Week 1: FEEL IT

Goal: feel the brakes and the turn behind the front foot.
Day 1: Baseline test. Then Drill 1, 3 sets of 8.
Days 2-5: Drill 1, 2 sets of 8. Drill 2, 3 sets of 8 (dry or off a tee). Drill 3 (dry), 3 sets of 8, holding your finish for 2 seconds to check that you're stacked.
Checkpoint: Does your front side stop hard? Is your weight still back when you start to turn?

Week 2: BUILD IT

Goal: keep the brakes on with a full swing.
Days 1-5: Drill 2, 1 set of 8 to warm up. Drill 3 off the tee, 4 sets of 8. Normal stance off the tee, "hit the brakes" every swing, 3 sets of 8. Drill 4, 2 sets of 8.
Upgrade: If you have a partner, one day of front toss starting from the feet-together setup.
Checkpoint: Film one swing a day from the side and pause at contact. Stacked?

Week 3: COMPETE WITH IT

Goal: take it to flips, BP, and games.
Days 1-4: Drill 2, 1 set of 8 to warm up. Front toss or BP, first round from the feet-together setup, 1 set of 8. Normal stance, mixed locations, "brakes" every swing, 4 sets of 8. Last round: drive everything middle or the other way. No partner? Mix tee heights and locations instead.
Day 5: Retest. Film 5 swings and count hard line drives out of 10. Compare to Day 1.

What's next

- Use your free swing analysis to have Coach Broc check your Week 3 swing.
- Want a plan built just for you? The 12-Week Program. Use code STARTER25 for $25 off.

5 hitting days a week, about 20-30 minutes, 1 rest day, 1 optional day. Works with just a tee; flips and BP are upgrades.
