

STRENGTH TRAINING

Ages 16–18

12-Week Progressive Program

LCB TRAINING

Coach Broc • Player Development Program

Program Overview

This program is built for high school athletes ages 16 to 18 who are ready to train at a competitive level. The focus is on building real, functional strength that translates directly to baseball performance — explosive hip power for hitting, upper body stability for throwing, and lower body strength for generating force from the ground up. This is serious training. Bring the effort every session.

Program Structure

Weeks 1–4 (Foundation): Establish movement patterns, baseline strength levels, and training habits under load.

Weeks 5–8 (Build): Increase volume, introduce more complex movements, and push working weights.

Weeks 9–12 (Strength): Progressive overload at high intensity — this is where real gains happen.

Train 3–4x per week. Rest 90 seconds between strength sets unless noted. Sessions take 45–60 minutes. Track your weights each week so you know when to progress.

Questions About an Exercise?

Exercise Glossary – Strength (Ages 16-18)

Quick form reminders for every exercise in this program, listed alphabetically for easy reference.

Band Pull-Apart: Hold a resistance band at chest height with arms extended, pull it apart until fully stretched across the chest, control the return.

Box Jump: Stand before a sturdy box, drop into a quarter squat and explode up, land softly with knees bent, step down between reps.

Bulgarian Split Squat (DB or barbell): Rear foot elevated on a bench, front foot forward, lower until back knee nearly touches the ground, drive through the front heel.

Chin-Up / Pull-Up: Hang from a bar with palms facing you (chin-up) or away (pull-up), pull until chin clears the bar, lower fully controlled.

DB Bench Press: Lie on a bench, dumbbells at chest level, press straight up and lower with control, keep shoulder blades retracted.

DB Incline Row: Set a bench to 45 degrees, lie face-down, row dumbbells toward the hips keeping elbows close to the body.

DB Overhead Press: Stand or sit, press dumbbells from shoulder height straight overhead, keep core braced and avoid arching the lower back.

Dumbbell Romanian Deadlift: Hinge at the hips with a slight knee bend, lower dumbbells along the shins feeling the hamstrings load, drive hips through to stand.

Face Pull (band): Anchor a band at face height, pull the band toward the face with elbows high and out, great for shoulder health.

Farmer Carry: Hold heavy dumbbells at your sides and walk for the distance given, keep shoulders back and core tight.

Goblet Squat: Hold a dumbbell vertically at chest height, squat deep keeping chest tall and elbows inside the knees.

Hex Bar Deadlift (or DB): Stand inside the hex bar (or use dumbbells), hinge and grip the handles, drive through the floor to stand tall.

Lateral Band Walk: Place a band just above the knees, lower into a quarter squat, step sideways keeping tension on the band throughout.

Meadows Row (landmine): Set up a barbell in a landmine, stagger your stance beside it, row the end of the bar toward the hip.

Nordic Hamstring Curl: Kneel with ankles anchored, slowly lower the body toward the ground resisting with the hamstrings, catch with hands and push back up.

Pallof Press: Anchor a band at chest height beside you, press it straight out from the chest and hold briefly, resist rotation throughout.

Push-Up (weighted): Standard push-up with a weight plate on the back, full range of motion, body in a straight line.

Single-Leg Romanian Deadlift: Balance on one leg, hinge forward with a flat back reaching the dumbbell toward the ground while the free leg extends back.

Squat Jump: Squat to parallel then explode up as high as possible, land softly and reset before the next rep.

Trap Bar Shrug (or DB): Hold dumbbells at sides, shrug the shoulders straight up toward the ears, hold briefly at the top.
