

SPEED & AGILITY

Ages 8–11

12-Week Progressive Program

LCB TRAINING

Coach Broc • Player Development Program

Program Overview

This program develops the athletic foundation every baseball player needs — quickness, coordination, and change of direction. At this age we focus on fun, varied movement and proper running mechanics rather than max-effort sprinting. These sessions build the athlete before they build the ballplayer.

Program Structure

Weeks 1–4 (Foundation): Learning proper running form, basic footwork patterns, and coordination.

Weeks 5–8 (Build): Adding reactive drills and increasing speed of footwork patterns.

Weeks 9–12 (Performance): Combining speed, agility, and reaction work into game-like patterns.

Train 2x per week, ideally on a grass field or open space. Always complete the dynamic warm-up first. Sessions should take 25–30 minutes.

Questions About an Exercise?

Exercise Glossary – Speed & Agility (Ages 8-11)

Quick form reminders for every exercise in this program, listed alphabetically for easy reference.

5-10-5 Pro Agility Drill: Start in the middle of 3 cones 5 yards apart, sprint 5 yards one way, touch the line, sprint 10 yards the other way, touch, sprint 5 yards back through the start.

A-Skips: Skip forward driving one knee up to hip height while pumping the opposite arm, alternate sides with a quick, light rhythm.

Backpedal: Run backward staying low and on the balls of the feet, take short quick steps.

Backpedal to Sprint: Backpedal for the distance given, then plant and explode forward into a sprint.

Box Drill (4-cone agility): Set 4 cones in a square, sprint/shuffle/backpedal around all 4 sides in sequence as directed.

Butt Kicks: Jog in place kicking heels up toward the glutes, stay light and quick.

Cone Shuffle: Stay low in an athletic stance, shuffle sideways to a cone and back without crossing the feet.

First-Step Quickness (whistle start): Start in athletic stance, react to the whistle with an explosive first step and sprint the distance given.

Flying Sprint: Build up speed gradually over the first distance, then hit full sprint speed for the final stretch.

Forward Sprint: Tall posture, drive the knees, pump the arms, run in a straight line at full effort for the distance given.

Ladder Drills: Move through the agility ladder using the footwork pattern described, staying light and quick on the toes.

Mirror Drill (partner): Face a partner a few feet apart, one player moves side to side or forward/back and the other reacts and mirrors the movement.

Reactive Ball Drop Sprint: Partner holds a ball at shoulder height and drops it without warning, athlete sprints forward to catch it before the second bounce.

Read & React Sprint: Start in athletic stance, react to the coach's called direction and sprint that way immediately.
