Back and Arm Strength

4-Week Starter

4 Weeks | 2 Days per Week

Prepared by Coach Broc - LCB Training

How to Use This Program

Equipment you need

Light dumbbells, a pull-up bar, a resistance band, and a medicine ball. At the school gym, use the School gym option column on each exercise.

- Do Day A and Day B each week, with at least 1 rest day between them (example: Tuesday and Friday). Takes 30-40 minutes.
- Do it on top of your normal baseball practice, not instead of it. Skip it on game days.
- At home, use light dumbbells, a pull-up bar, a resistance band, and a medicine ball. At the school gym, use the "School gym option" column to go a little heavier.
- Light weights still work: move slow on the way down (3 seconds), pause 1 second at the top, and finish every set with 2 reps left in the tank. Never max out.
- Weeks 1-2: learn the movements. Weeks 3-4: add 1 set to each exercise or 2 reps per set.
- Safety: Stop any exercise that causes sharp pain (soreness is normal, pain is not). Have an adult or coach around when lifting at the gym. Do not train your arm hard the day before you pitch or throw a lot.
