SPEED & AGILITY

Ages 16–18 · Phase 1 (Weeks 1–4)

Foundation Phase

LCB TRAINING
Coach Broc • Player Development Program

Program Overview

Phase 1 refines sprint mechanics, acceleration, and baseline agility. Workout A uses wall drills and the 5-10-5 to build technical foundations. Workout B adds short reactive clusters to train explosive first-step quickness from the very first week.

Program Structure

Workout A: Sprint mechanics, max-effort agility, and game-speed reaction work.
Workout B: High-intensity clusters combining sprints, agility, and reactive movements at full effort.

Train 3x per week alternating A and B. Phase 2 unlocks after 30 days. Phase 3 after 60 days.

Exercise Glossary – Speed & Agility Phase 1 (Ages 16-18)

Quick form reminders for every exercise in this program, listed alphabetically for easy reference.

3-Cone L-Drill (timed): Set 3 cones in an L shape 5 yards apart, sprint to the first, back to start, around the outside of all 3 and back through start as fast as possible.

5-10-5 Pro Agility (timed): Start in the middle of 3 cones 5 yards apart, sprint 5 yards and touch, 10 yards opposite and touch, 5 yards back through start.

A-Skips: Skip forward driving the knee sharply up to hip height, push off the toes powerfully, pump the opposite arm.

Acceleration Sprint (3-point stance): Set up in a 3-point stance, explode forward on signal, drive forward aggressively for the distance given.

Ankling Drill: Walk forward with very quick light toe-to-ball-to-toe contacts, ankle stiffness is the key, keep ground contact minimal.

B-Skips: Like A-Skips but actively claw the leg back down toward the ground before pushing off.

Banded Hip Drive Sprint: Attach a band around the hips to a fixed point behind you, drive forward against the resistance focusing on hip extension.

Box Drill (reactive): 4-cone box, coach calls a direction or color as athlete moves, athlete reacts and changes path mid-movement.

Broad Jump: Swing arms and jump forward as far as possible off both feet, land softly on both feet.

Flying 30: Build speed gradually over 20 yards then hit absolute maximum velocity for the final 30 yards.

Hurdle Hops (single-leg): Hop over low hurdles on one leg, land softly, minimize ground contact time, switch legs each set.

Mirror Drill (competitive): Face a partner, one leads with direction changes, the other mirrors reactively, compete to maintain position.

Overspeed Sprint (band-assisted): Attach a light band to the waist with a partner providing light forward pull, run faster than normal top speed.

Power Skip: Exaggerate the A-Skip with maximum height and distance, drive the knee as high as possible.

Reactive Cone Sprint: Multiple cones in various directions, coach calls a cone number or color and athlete sprints to it immediately.

Resisted Sprint: Resistance band attached to the waist, partner holds the other end, sprint hard against the resistance.

Sled Push: Low athletic stance, drive the sled forward with short powerful steps, lean into it, drive through the balls of the feet.

Wall Drill (double-leg): Both hands on a wall, drive both knees up alternately in a quick rhythm, practice the sprint cycle mechanics.
