STRENGTH TRAINING

Ages 8–11 · Phase 1 (Weeks 1–4)

Foundation Phase

LCB TRAINING
Coach Broc • Player Development Program

Program Overview

Phase 1 builds the movement foundation every young athlete needs before adding load or complexity. Each week has two workouts: Workout A uses traditional straight sets to groove the movement patterns, and Workout B uses short clusters to introduce explosive, athletic training in a fun format. Alternate A and B across your training days each week.

Program Structure

Workout A: Straight sets — focus on form, control, and building the habit.
Workout B: Clusters — short bursts of 2–3 exercises done back to back, rest, repeat.

Train 2–3x per week. You do not need to do both workouts in the same day — alternate them. Phase 2 (Weeks 5–8) unlocks after 30 days. Phase 3 (Weeks 9–12) unlocks after 60 days.

Exercise Glossary – Strength Phase 1 (Ages 8-11)

Quick form reminders for every exercise in this program, listed alphabetically for easy reference.

Bear Crawl: Hands and feet on the ground, knees hovering just off the floor, crawl forward keeping hips low and steady.

Bird Dog: On hands and knees, extend the opposite arm and leg straight out, keep hips level and core tight.

Bodyweight Squat: Feet shoulder-width apart, chest up, sit hips back like sitting in a chair, knees track over toes.

Box Jump: Stand before a sturdy box or step, drop into a quarter squat and jump up, land softly with knees bent.

Glute Bridge: Lie on back, knees bent, drive hips up by squeezing glutes, avoid arching the lower back.

High Knees: Jog in place driving knees up toward chest height, pump arms naturally.

Lateral Hop: Jump side to side off both feet, land softly and stick each landing before hopping back.

Mountain Climbers: In a push-up position, drive knees toward chest alternating quickly, keep hips level.

Plank Hold: Forearms and toes on ground, body in a straight line from head to heels, brace the core.

Push-Up: Hands under shoulders, lower chest to the ground then push back up; knees down is fine for beginners.

Squat Jump: Squat down then jump as high as possible, land softly and reset before the next rep.

Vertical Jump: Stand tall, swing arms and jump straight up as high as possible, land softly with knees bent.

WEEK 1 — FOUNDATION PHASE
