Program Overview

Disclaimer

This program is designed for healthy individuals. Consult a physician before beginning any new exercise program. Stop immediately if you experience pain or discomfort. LCB Training is not responsible for any injuries sustained while following this program. Proper form always takes priority over weight or speed.

The LCB Strength Program is a 12-week progressive resistance training plan built specifically for baseball athletes. Every exercise is selected to develop the muscle groups and movement patterns that directly translate to the field — rotational power, hip drive, upper body strength, and core stability.

What you will develop:

- Explosive hip and leg drive for more bat speed and pitch velocity
- Rotational core strength for more powerful swings and throws
- Upper body pulling and pushing strength to protect the shoulder
- Lower body stability and single-leg strength for fielding and base running
- Progressive overload across all 12 weeks to ensure continued gains

Program Structure

3 training days per week. Each session is approximately 45-60 minutes. The program is structured in three 4-week blocks, each increasing in intensity and volume. This sample includes Week 1 — the foundation block.

Week 1 — Foundation Block

Focus: establishing movement patterns, baseline strength, and body awareness. Keep rest periods at 60-90 seconds between sets. Prioritize form over load.

Day 1 — Lower Body Power

Exercise	Sets x Reps	Load	Form Cue
Barbell Back Squat	4 x 6	70% effort	Feet shoulder-width, drive knees out, chest tall throughout
Romanian Deadlift	3 x 8	Moderate	Hinge at hips, soft knee bend, bar stays close to legs
Bulgarian Split Squat	3 x 8 each	Bodyweight or light DB	Rear foot elevated, front shin stays vertical
Lateral Band Walk	3 x 12 each	Light band	Stay low, controlled steps, keep hips level
Plank Hold	3 x 30 sec	Bodyweight	Neutral spine, squeeze glutes and abs throughout

Day 2 — Upper Body Strength

Exercise	Sets x Reps	Load	Form Cue
Dumbbell Bench Press	4 x 8	Moderate	Control the descent, press with full extension
Bent-Over Barbell Row	4 x 8	Moderate	Hinge to 45 degrees, pull to lower chest, squeeze shoulder blades
Landmine Press	3 x 10 each	Light-Moderate	Single arm, rotate and press, great for shoulder health
Face Pull	3 x 15	Light band/cable	Pull to forehead level, elbows high, great for rotator cuff
Pallof Press	3 x 10 each	Light band	Anti-rotation core exercise, press out and hold 2 seconds

Day 3 — Total Body & Explosiveness

Exercise	Sets x Reps	Load	Form Cue
Trap Bar Deadlift	4 x 5	70% effort	Neutral spine, drive the floor away, full hip extension at top
Medicine Ball Rotational Throw	4 x 6 each	8-10 lb ball	Load into trail hip, rotate and throw hard into wall

Goblet Squat	3 x 10	Moderate KB/DB	Elbows inside knees at bottom, chest tall, full depth
Single-Arm DB Row	3 x 10 each	Moderate	Brace on bench, pull elbow to hip, full range of motion
Dead Bug	3 x 8 each	Bodyweight	Lower back stays pressed to floor, slow controlled movement
