

SPEED & AGILITY

Ages 12–15

12-Week Progressive Program

LCB TRAINING

Coach Broc • Player Development Program

Program Overview

This program is built for athletes ages 12 to 15 who are ready to take their speed and agility to a competitive level. At this age we focus on sprint mechanics, explosive first-step quickness, multi-directional agility, and game-speed reaction work — all directly transferable to the baseball field.

Program Structure

Weeks 1–4 (Foundation): Sprint mechanics, basic change of direction, and footwork precision.

Weeks 5–8 (Build): Higher intensity drills, reactive training, and increasing volume.

Weeks 9–12 (Performance): Game-speed application, max-effort sprints, and complex agility patterns.

Train 2–3x per week on a field or open space. Always complete the dynamic warm-up. Rest fully between sprint sets — speed work is about quality, not grinding through fatigue.

Exercise Glossary – Speed & Agility (Ages 12-15)

Quick form reminders for every exercise in this program, listed alphabetically for easy reference.

3-Cone L-Drill: Set 3 cones in an L shape 5 yards apart, sprint to the first, back to start, around the outside of all 3 cones, and back through as fast as possible.

5-10-5 Pro Agility: Start in the middle of 3 cones 5 yards apart, sprint 5 yards and touch, sprint 10 yards the opposite way and touch, sprint 5 yards back through start.

A-Skips: Skip forward driving the knee up sharply and pushing off the toes, pump the opposite arm, alternate rhythmically.

Acceleration Sprint (10-yard build): Start from a 3-point stance and accelerate as fast as possible over 10 yards, focus on forward lean and powerful drive phase.

B-Skips: Like A-Skips but actively extend and claw the leg back down to the ground before pushing off, reinforces proper sprinting mechanics.

Backpedal to Sprint: Backpedal the given distance staying low and controlled, then plant and explode forward into a full sprint.

Box Drill (4-cone): Set 4 cones in a square, sprint/shuffle/backpedal around all 4 sides in the sequence directed by the coach.

Flying 20: Build up speed for 20 yards then hit maximum velocity for the final 20 yards, timed or effort-based.

Hurdle Hops: Jump over low hurdles (or cones) with both feet, land softly, minimize ground contact time.

Ladder Drills: Move through the agility ladder using the pattern described, staying sharp and light on the toes.

Mirror Drill (partner): Face a partner, one athlete moves and the other mirrors every direction change reactively, stay in an athletic stance throughout.

Reactive Ball Drop: Partner drops a ball from shoulder height, athlete reacts and sprints to catch it before the second bounce.

Resisted Sprint (band): Attach a resistance band around the waist with a partner holding the other end, sprint for the distance given against the resistance.

Shuffle to Sprint: Shuffle laterally for the distance given, then plant and explode into a forward sprint on the signal.

Wall Drill: Stand facing a wall, lean into it with hands flat, drive one knee up at a time to practice the high-knee sprinting position.
